# TITANIUM DIOXIDE

The White Knight

## TITANIUM DIOXIDE E171

Titanium Dioxide is manufactured from Ilmenite and Rutile ores. It is produced as a brilliant white pigment with many uses, and it is the white colorant of choice in food, drugs and cosmetic – especially in panning or tablet coating. Titanium Dioxide pigments are inert and thus have excellent light, heat and pH stability.

### APPLICATIONS:

Confectioneries, Pharmaceuticals, Beverages.

### SHADES:

White shade

### STABILITY CONDITIONS:

pH Range	Heat	Light
3-8	Very Good	Very Good

### STANDARD PACKAGING:

Oil Dispersible: Liquid (Up to 20%)  
 Water Dispersible: Liquid (Up to 60%)  
 (Special formulation to avoid sedimentation)  
 Powder form: 99%
